

CHLORINATED RUBBER INTERMEDIATE COAT

Product information

- 1-Suitable for interior and exterior use.
- 2-Fast drying.
- 3-Resistant to salt water, splashes of mineral oils, aliphatic Solvents, petrol, and a wide range of chemicals but not to Animal and vegetable oils or aromatic solvents.
- 4- Good abrasion resistance

Physical data

Colour:	customer request
Finish:	flat
Flash point:	24 [°] C
Volume solids:	42 ±5%
D.f.t:	45 - 50 microns
Specific gravity:	1.3 ± 0.08gr/cm ³
Theoretical coverage:	9.3 m ² /lit (at 45 µ d.f.t)

Drying time at 25 [°] C:	
Touch dry:	30 min
Dry to handle:	2 hrs
Full cure:	72 hrs

Component:	1
------------	---

Application methods:	conventional spray or brush or Airless spray or roller
----------------------	---

Recoat intervals* :	10 [°] C	25 [°] C	40 [°] C
(mild condition) : Min:	6 hrs	2 hrs	1 hrs
Max:	24 hrs	10 hrs	6 hrs

Recommended thinner:	FARCO THINN 56
Recommended cleaner:	FARCO CLEAN 56

Curing mechanism:	by solvent release
-------------------	--------------------

Substrate:	primed steel
------------	--------------

*: For recoating the surface should be free of dust ,grease and contamination

Typical uses

As a intermediate on steel structures in moderately
To severely corrosive environment, including permanently
Submerged surfaces .

Application information

This Rangan Far's product is a chlorinated rubber intermediate
For industrial and marine use.

To obtain the maximum performance for which this product
Is formulated, strict adherence to all application, instructions,
Precautions, conditions and limitations is necessary.

Application equipment

The following equipment is listed as a guide and suitable
Equipment from other manufactures may be used.

Adjustments of pressure and change of tip size may be
Needed to obtain the proper spray characteristics.

1-Airless spray: standard airless spray equipment having
A 28:1 or higher pump ratio and a fluid tip with a 0.330 to 0.381 mm
Orifice.

2-Conventional spray: industrial equipment with suitable
aircap having a fluid tip with A 1.4-1.6mm orifice .

3-Brush/roller.

4- Mixer

Caution

1-Handle with care.

2-Avoid inhalation of possible solvent vapours or
Paint mist, as well as paint contact with skin and eyes.

3-Apply only in well ventilated areas and ensure that
Adequate forced ventilation exists when paint applies is
In confined spaces or when the air is stagnant.

4-Always take precautions against the risks of fire

RANGAN FAR CO.
MANUFACTURER OF INDUSTRIAL PAINTS

FARCO INTER 561

And explosions.

5-Don't empty into drains and take precautionary measures

Against static discharges.

Application procedure

1-Flush equipment with recommended cleaner before use.

2-Stir all material thoroughly before applying.

3-Thinning with thinner as needed for workability.

4- Apply a wet coat by even, parallel passes. overlap each

Pass 50% to avoid bare areas, pinholes or holidays.

Small damaged or bare areas and random pinholes or

Holidays can be repaired by simply applying additional material.

5-In confined areas ventilate with clean air during application

And drying until all solvents are removed.

Temperature and humidity of ventilating air must be such that

Moisture condensation will not form on surface.

6-Clean all equipment with recommended cleaner immediately
after use.

Environmental condition

Environmental temperature must be 10-40°C.

Surface temperature must be at least 3°C above dew point

To prevent condensation. At freezing temperature surface

Must be free of ice and relative humidity below 80 %.

Surface preparation

The surface must be clean and dry .all dirt, grease and other

foreign materials should be removed .old primed surface

must be smoothly wire brushed.
